Fredericks, Munro & Co.

MANUFACTURERS OF

FIRE BRICK

—FOR—

BLAST FURNACES,

ROLLING MILLS AND STEEL WORKS

OFFICE AND WORKS:

FARRANDSVILLE, CLINTON COUNTY, PENNA.

CAPACITY of WORKS, 5,000,000 YEARLY.

ESTABLISHED 1860.
FOURTH EDITION, 1884.

TO THE TRADE.

The wants of consumers of Fire Brick demand an improved form in presenting the lines of goods carried by manufacturers, and to meet this want we place before our customers and the trade in general a revised Catalogue of the shapes we carry in stock.

In ordering Fire Brick it is best always to state the purpose for which they are required. The variety of uses for which Fire Brick are now required induce us to separate, screen and boil our clays in order to produce the following qualities, expressly adapted to the purposes named.

We have branded our standard shapes as follows:

ACME, for service in crucible, open hearth and other steel works, glass and malleable iron works, where refractory brick is essential.

EUREKA is a rolling mill brick which has given the highest satisfaction. We also make Hearths and Boshes of this mixture.

CLINTON is a hard friction Brick made for great wear, especially adapted for use in furnace linings, cupolas, boiler arches, sugar refineries and pulp mills.

Our furnace blocks possess the desirable feature of being uniform in size, pressed on edge, thereby insuring close joints in laying up.

The six-foot seam of Fire Clay from which our brick are produced with the mechanical labor, gives us the qualities to manufacture the several grades stated above, and induce us to warrant the brick equal to the best manufactured. The chemical analysis of our clays by J. Blodget Britton, of the Iron Masters' Laboratory, is sufficient evidence of their refractory nature.

We give close attention to the manufacture of irregular or useful shapes, and insure entire satisfaction in executing the work.

Relying on your desire for a Fire Brick expressly adapted to your wants, we will be glad to quote prices.

Our works have an annual capacity of 5,000,000 Brick, and we are able to fill large orders on short notice.

Thankful for your past favors,

Respectfully,

FREDERICKS, MUNRO & CO.
